The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8 and 16-26 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Zobel et al.

Zobel et al discloses molding compositions comprising polycarbonate, graft ABS polymers and a phosphonate amine which directly corresponds to those of the present claims. The patented invention may also contain additional phosphorus flame retardants which overlap with those of the present claims. Weight percentages of components also overlap. See col. 1, line 50 through col. 14, line 29 and especially cols. 11 and 12. No patentable difference is readily ascertained between present and patented inventions.
